Students in the Year 5/6 Class have their own class blog which is an online website that they can access both at school and home in a secure web based environment. They currently access it for weekly homework tasks set by the teacher and various curriculum areas in the classroom. The blog is updated weekly with direct links to a range of educational websites including Study Ladder, Scootle and Program Achieve, which support current learning in the classroom. It is also a very effective teaching and communication tool and has been well received by both students and parents.
